

Alleged Reasons for UFO Secrecy

So back to Roswell in 1947. The theory is that at least one flying disc was recovered with alien bodies inside it. With this shocking evidence and the sheer panic that the US public had shown a decade earlier to Orson Welles "War of the Worlds" radio broadcast the story was quickly hushed up internally and externally. By 1948 another downed UFO was discovered in Aztec, New Mexico with alien & human body parts found amongst the wreckage of the craft. This was truly chilling. A live alien or EBE was also found.

Next comes the Majestic 12 group set up by President Truman in Sept of 1947. A team of elite scientists, politicians and military to investigate and study the UFO phenomenon in secret. A group that would eventually be part of a hidden project that even the President would not be privy to.

By 1954 the US had signed a "treaty" (whether it was an agreement or a surrender is debatable) with small grey aliens. Eisenhower himself is alleged to have disappeared on 20th Feb 1954 to sign this agreement. The cover story being that he had emergency dental treatment. Even though there is no record of the dentist treating him. The treaty meant that the US would be given technology in exchange for covering up the existence of extra-terrestrials and allowing ET to abduct and experiment on humans and animals to assist their species survival.

What followed was a programme of media ridicule, dis-information

and phoney investigations like Project Sign and Bluebook to discredit witnesses. The secret had to be kept to prevent society from collapsing and the profound effect on the world's religions.

The eventual plan was to develop some kind of defence to protect the earth and reveal the alien presence. But not until firstly we can protect ourselves and secondly the human race is ready to accept it. Many of these defence projects are now in private "defence contractors" hands to avoid having to release anything via FOI. Meanwhile there are similar groups across the globe who operate outside their governments to keep a lid on the secret. To this day we are still not any closer to disclosure and only a small semi-military group know we are not alone for sure. Many involved are not given the whole story and various tactics are used to silence anyone who tries to speak out.'
