awesome! i saw something too,it was fast, i believe I agree with Vickie Shelton, add HAARP and the PLANNED MAN-MADE earthquakes,sinkholes, solar flares and radiation storm,seismic activity by volcanos,etc....God said the heavens would be shaken,but I think the general consensus between all WATCHERS and CHRISTIANS is a KNOWING SOMETHING BIG AND CATASTROPHIC IS HAPPENING..SPED ALONG WITH HAARP, and the Word of God,we got ourselves Rapture trigger coming,keep Jesus in focus,prepare our souls,TY,GBY

this shaking is a horizontal movement, and a pulse type with random period, but during the shaking interval, the frequency seem to be fixed at about 2 hz, clearly, the deep layer of crust begin to break, notice also, when it reach ground , the osc. change to sin wave, the fundamental component of the breaking because the earth crust filter the signal from a rect. pulse into a sin wave only, good luck, it is a basic proof of CHRIST, only GOD can do this worldwide.AMEN!!!

Well done and very dramatic but it seems like the intervals are very like a catèrs rubbing up against the tripod leg. Seismic activity that repetitive would have been noticed. In fact we have footage of cams during seismic and the images are effectively blurred. RE: Diaspora we should not long for his return for it will bring damnation we must persevere and pray as Abraham over Sodom and Gamorrah.

IDEAS

You still have to put them together.

The tripod had no problems. Remember I used 2 different cameras and tripods. Plus I have since used the same set up on a different night no shaking of the moon.

Hosea 4:6:
My people are destroyed for lack of knowledge: because thou hast rejected knowledge, I will also reject thee, that thou shalt be no priest to me: seeing thou hast forgotten the law of thy God, I will also forget thy children.

What is the music playing please?
I'm more fascinated that they knew earth had its 'wobble' 3000 years ago but then our ancestors watched the stars more than we did so it stands to reason.
The pole is already shifting (allegedly)

Should check out Astral Traveler channel, The videos are a little long but he cover a lot of information. He's very straight forward and honest. If he doesn't know, he will tell you. Amazingly, he does not get your normal trolls on his channel because they can't debunk the NASA data. One video shows the moon all over the place.

Should check out Astral Traveler channel. I believe he has proved object X exists and he has proven without a doubt the moon is all over the place in his last two video. He uses NASA's own data to prove this and nothing else. The moon proof was amazing. And he knows out poles are flipping magnetically.

Aftershocks from Thursday's California earthquake? I'm just guessing , but if you live in Cal or even Oregon, the quake was felt over a wide area, and naturally there'd be aftershocks.. the shaking looks just about right, intensity wide. So.. do you live in or near California?

The vibrations happened in 7 second intervals. Very interesting. Thanks for sharing.
