Alien Implants

BY Bill Efird

Ever since the UFO craze began UFOlogists believe that alien implants are the tangible evidence they have long sought.

These "alien implants", are found in people who claim to have been abducted by aliens. There is no sign of entry, nor do the abductees or the doctors who examine the implant area, have any knowledge of how the object could have entered the body. Since 1994 these objects have been being surgically removed. They look like anything from a shard of glass to triangular shaped mental. Physicians can tell us that you can however get objects inserted into your body, through a fall or while walking around barefoot.

Tissues surrounding the objects show no signs of irritation. Tissue samples taken had shown nerve cells with no purpose to have been there. Also their has been no scar surrounding the insertion area.

Dr. Rodger Lier, a MUFON physician and medical consultant, has removed 11 of these "implants". These objects have been sent to such laboratories as Los Alamos National Labs, New Mexico Tech, and the [University of California at San Diego](#). The laboratories found that early samples they tested where consistent of that of a passing meteorite. While other tests simply said that the samples were "not of this earth".

One such case Dr. Lier has been working on, the implant he removed is believed to emit radio frequency 14.749950 MHZ, a deep space frequency. The object was about 4 millimetres in length and about the thickness of a pencil lead, and a was a dull grayish color. When the object was removed, it broke into 12 pieces, hours later, the objet is reported to have tried to reassemble itself. After the object was removed, the subject claimed to have his mood and thought process changed back to how it was before he discovered the object and had it removed.

A common recurrence in these phenomena is that people wake up with blood drops on their clothes, and two healed puncture wounds, with no memory or explanation as to where they came from. Dr. Lier claims, what is most common in these cases that he has worked on is, there is no portal of entry, there is also no inflammatory response. and the membrane that surrounded the object could not be cut even with a scalpel.

Many Implants however seem to disappear. Whitley Strieber, author of Confirmation, had, what he believed to be an Implant, which later turned out to be collagen, the stuff from what cartilage is made out of In one case Michelle La Vigne an alien abductee claims her implant simply vanished. John Mack a Harvard Psychiatrist who is well know for his work with abductees, has had analysis performed on these implants in a laboratory. One tuned out to be, "carbon, silicon, oxygen, no nitrogen, and traces of other

elements," stuff easily found on earth.

Others have been to be found of biological material, such as a cyst.

In the 1980's the CUFOS did a study on the strange phenomena. A [person](#) who claimed to have been abducted by aliens and also believed to have an implant was proved wrong when he blew his nose and it fell out.

It's my belief that what these implants or foreign objects are won't be known for a very long time, but it will be known.
