

Akhenaten Fellowship

What is the central core of our faith? Light is our salvation. It's that simple really. Of course to understand what is meant by Light being our salvation we must understand that God is Light. Anything opposed to the Light is the material world. The material world is darkness. Our material existence is like a prison for the soul. The soul itself has many potential attributes for example an animal's soul is very earthbound while an enlightened man like Akhenaten has a soul of pure Light which transcends the material world. Thus Akhenaten is not imprisoned in this material existence but can travel from the realm of Light to the material realm with ease. As Atenists we too want to attain a soul of pure Light. Such a being is not subject to the natural laws of material existence but is a free being. When a person dies, naturally if their soul is of this world, then they are bound to this world and cannot escape and is destined to be reborn a prisoner of the material plane of existence. A person whose soul is Light can transcend the bounds of death and is free to choose to be with God or to return to this world conscious of who they are and can decide what life they wish to live. So much misery in this world only because most people are ignorant of the Light and dwell in darkness. If people just knew that they have a choice to be like God and be free, their lives no matter where they dwell would be so much happier. Free will can only be attained by being one with God which is Light. If you can grasp that understanding you are on your way to freedom eternal....

Today's Atenism is about bringing out the God within each one of us. This Solar Aspect is a potential we all have but few have expressed this in their lives. We are all gods in a sense if we embrace the Godhood of the One. When we embrace Aten In our lives and dedicate ourselves to His service we become as God knowing good and evil and receive the guidance of the infallible Lord of all. As an Atenist I am God in the flesh as you too as well are God in the flesh if you are willing to receive Him. Thus we become as little gods with that Golden Light and Solar Aspect. We become as Light reflects off the water glistening in the Sun. Those who do not embrace the Light are in darkness and are lost for without the Light in our lives how can we be saved in this life and the next. In darkness one cannot see. In the Light all things are visible. Thus as Atenists we bathe ourselves in the Light washing away all our sins and ignorance. We cloak ourselves in the Light which keeps us warm. The Light shines ever before us guiding our steps so that we may not stumble. This Light which is in the Disk and emanates there from is the true God. As Atenists we worship the Light so that we may become as the Light! The ancients worshipped different gods with solar aspects. The moderns worship not only the One God which is the Light, but we also worship ourselves and our Godlike potential. Thus we are replacing the gods of the heathen made of stone, wood or precious metals with living Gods, ourselves in fact we are the gods of the future. The is the true Gnosis.
