CSETI Ambassador to the Universe Training

Crestone, Colorado - June 13-19, 2010

Register Today!

Contact coordinator@cseti.org to Secure Your Place!

DON'T MISS THIS FABULOUS OPPORTUNITY to join Dr. Steven Greer in the mysterious **San Luis Valley** of Colorado, USA. This area of Colorado is well known for its UFO sightings and anomalous activity as well as its many spiritual centers. This will be the 17th year that we have been doing trainings here and those amazing experiences are documented in Dr. Greer's books.

This nearly weeklong intensive prepares you to make open, peaceful contact with Extraterrestrial civilizations as a citizen-diplomat from Earth.

Topics covered include:

- CSETI CE-5 Protocols to initiate contact with ETs using consciousness, coherent thought, lasers, electromagnetic signals, and group processes
- The nature of mind and how to experience the unbounded, cosmic aspect of consciousness always within us. This will include specific meditation techniques to experience cosmic consciousness, achieve natural remote viewing and precognition abilities, and other aspects of higher states of consciousness
- A direct experience of the structure of the cosmos that integrates the unified field of cosmic awareness, space/time, matter, electromagnetism, and the subtle realms of thought/light - and how these interface with ET technologies and communication systems
- Practice with the CSETI CE-5 Protocols and learning to discern ET spacecraft from man-made classified technologies.
- An in-depth understanding of who is behind ET related secrecy - and why

- How to create a CSETI Contact team in your area and initiate on-going peaceful contact with ET civilizations
- Field work in practicing and making ET contact each night under the stars
