## **UFO's spotted over Texas, USA, multiple videos and witnesses! 07/04/2012**

April 21, 2012

There has been a large UFO sighting over Texas, USA recently.

Red lights appeared over the sky and have been witnessed by multiple people all over the City. Whitness claim mysterious orbs of light were hovering over lake Moses. The UFO's apparently formed a triangle shape as well as a "Z" shape.

Another user: user/debjames100 claimed:

Around [8:30](#) to [9:30](#)pm, on April 7th, 2012 my son called and said he and his friends had been watching these Red Lights in the sky. They started in a row and then formed a figure 8, then a half moon. This is what we saw when we went out to see the sky over Texas City, TX! A Z pattern when we first went out, then they went away one at a time until it was over.

Another video was uploaded by user/MrDshook01 and he/she says this:

About 20 of us watched the lights move around & slowly fade away. This went on for about 15-30 minutes.

Finally, there is yet another video of the same sighting and the video was uploaded by user: user/party1hard

What is going on?! Are these simply just flares as some people have claimed, or is there something more to this? You decide.

These are " high level flares". As oppose to the more common low level flares. Lol.

what's the deal with lights in the sky? What aircraft that wants to remain hidden covers itself in lights? I've never understood that. Are UFO's required to have lights so that we can see them at night? If a UFO was trying to hide from us, why are they covering themselves with blinking lights? And if they weren't trying to hide from us, why haven't they made contact? Please explain.

military grade flares There is a small parachute attached which is deployed once the flare reaches it's position. The heat from the flare reduces the drop time since heat rises kinda like a hot air balloon the wind is what made it probably move

UFO means unidentified flying objects. I dont see why anyone wouldnt believe that. to this lady it was a ufo but to the guy since he knew what they were it was not. most people think that ufo's means aliens (extraterrestrial), which do not exist.

I SAW THE VERY SAME THING during the day in Vancouver, BC – Canada during the day on August 6th 2012. It was 4pm... the sky was clear and at least 10 people saw it besides me. I had ONLY my iPhone with me, therefore I could not capture on video, but it was real. And YES! They were also changing formation... very slowly. Not a flare! Real deal!
