

Brainwave Entrainment Review?

Brainwave Evolution is a new patent pending product using the latest cutting edge technology in the field. This product is supposed to use one of the most powerful patent pending technologies on earth to entrain your brainwaves.

Brain Evolution System is the latest product to be released in the Self Improvement Industry. It promises to help you think Faster and Sharper.

It can grant you Limitless Energy, help you to think like a Genius, and enable you to Release all stresses and tension. Brain Evolution System is a six-level meditation program that uses special sounds to help influence your brainwaves.

Every body in the world knows that meditation is good for our minds and body. Science has proved this beyond any doubt.

Quieting our minds has tremendous untold benefits. And yet how many of us truly have time to quiet our minds for even 10-20 minutes on end each day? This is where the Brain Evolution System comes in.

The Brain Evolution System uses something known as "brainwave entrainment" to help skip years of unnecessary meditation. It uses specially manipulated sounds to help influence brainwaves, putting the mind into a deep state of meditation within minutes of listening - removing the need for countless hours of mind-quieting, Zen-monk-like practice.

But we've heard all of this before - with ineffective programs such as Holosync and Hemi-Sync.

What sets BrainEv apart from it's competitors, claim the developers, is it's patent-pending 3 Point Dynamic Entrainment Audio Process. This means BrainEv uses three different entrainment methods at the same time - stopping the brain getting too accustomed to one particular pattern and more closely-matching how brainwaves really work.

Sounds impressive... But does the Brain Evolution System really live up to its claims?

Well, to put it to the test - I decided to try it myself for two whole months!

The first level can only be described as a true sound scape. With it's natural, "distant" ethereal feel, you could tell a million things were going on in the background - yet couldn't help but just relax and let them float by.

Now, I've listened to a lot of relaxation music - so I'm used to trickling waterfalls and singing bowls. But this audio was genuinely Powerful. You could feel it working, influencing your brainwaves, and helping you to relax further.

It's recommended you listen to each 30-minute level once per day, six days a week, for a whole month. Then you move onto the next level - finishing all six levels within six months.

Well, after my first listening session, I instantly felt more relaxed. My head was less "foggy" - and I enjoyed a focus and clarity I'd not experienced in quite some time. It's hard to explain, however I had a smile on my face - and didn't really know why!

I continued throughout the first month - and saw a truly noticeable difference in my behavior. I became more and more relaxed and calm. My brain seemed to operate faster, and I became more quick-witted. My confidence continued to improve, without any real effort.

During the second month, I worked with level two. And I can honestly say that - again - I began noticing real differences.

Now, I'm not a person that enjoys writing positive reviews. It's much easier to slander than praise. But once again, the Brain Evolution System made a very definite, positive impact.

Colleagues commented on my permanent state of happiness. I felt much more relaxed, even during the most stressed-out periods of my day. My thinking speed definitely increased - and the tablets helped boost my focus even further. Creative spurts increased. My reading speed rocketed. I found myself coming up with more elegant solutions to problems. I also found myself soaking up information more rapidly than before.

And another thing: I began waking up after just five hours of sleep. This simple meditation program was reducing my usual 8 hours down to just five - thanks to 30 minutes of listening, six times a week.

So, does the Brain Evolution System work?

During my two-month trial, it genuinely delivered an impressive set of results - all exactly as promised.

It helped Sharpen my mind, Reduce my stress levels, and Increase my energy.

Yes, I've tried meditation programs and brainwave CDs before, but never with the powerful results that the Brain Evolution System provided.

The developers claim that's down to the fact that it utilizes a "3 Point Dynamic Entrainment Audio Process" to influence brainwaves.

But what I do know is that the Brain Evolution System helped clear the foggy mind of a usually critical reviewer.

BrainEv Pros: Powerful results, professional package, round-the-clock support.

BrainEv Cons: Still requires 30 minutes of your time, 6 days a week.
