

In an email sent to his followers announcing his dissatisfaction with media reports, James Gilliland said "I believe the majority of the UFO community has become convoluted and riddled with disinformation".

The ECETI ranch is a UFO hotspot regularly visited by UFO enthusiasts and investigators who expect to see UFO's, orbs and light trails. UFO's have been reportedly been pursued by US Government aircraft above Gilliland's ranch.

Gilliland is a famous UFO researcher who seeks publicity and self promotes his property to UFO groups and reporters but who now wants to pursue investigations without UFO and paranormal groups getting in the way.

Here is the full text of Gilliland's explanation as to why he is withdrawing from UFO and paranormal groups.

"Before we begin I would like to express this letter is not to the people of integrity which are far and few between in the UFO community. They will understand and completely agree with what I am about to say. This letter is to all the conference boards, talk show hosts and others within the community who continue to deal with half truths and perpetuate the dark threatening agendas concerning our off world visitors totally ignoring the fact that the majority of off worlders are very spiritually and technologically advanced as well as benevolent.

The fear and suspense along with other hidden agendas via disinformation agents has so infiltrated ufology that the higher truth has been virtually pushed out. The UFO community has become the very conspiracy and censors of truth they set out in the beginning to expose. It has become a plethora of disinformation, misinformation, and massive egos wanting to be messiahs each thinking they have the big picture when all they have is a small piece of the pie. The field has become so corrupted, convoluted, and whacked out the real contactees and the bigger picture with positive contacts really have little or no

forum to express. They are eventually squeezed out especially when it comes to women. Women who do not agree with the dark foreboding agendas of many ex-military or top government officials who either see everything as a threat due to pre-programming or are there to support the war industry which needs a new threat to continue its massive budget.

The vast majority of off worlders which includes those coming from the higher dimensions are benevolent so why is the vast majority of the conferences and radio show programming focused on the negative regenerate side? Why is the negative, regenerate side given all the air and podium time which is completely disproportionate to reality? Personally I believe the majority of the UFO community has become so convoluted and riddled with disinformation along with those sitting on boards who perpetuate the mis and disinformation with NWO connections not to mention the material driven circus there is no way any off world visitor would have anything to do with it. As a venue for truth it is unsalvageable.

This is why I have no more desire to operate or

involve myself further with these groups. I will continue as a spokesman for contact with benevolent off world visitors through other venues. I will also continue to hold our own conferences and invite those on the cutting edge who are working towards the advancement or awakening and healing of humanity and the Earth. The Self Mastery and Kunlun classes will continue as well. With the regular appearances of the UFOs here at ECETI and the appearances of grand masters which have been photographed one would think there would be a strong interest and desire to promote the ongoing outrageous events happening at the ECETI Ranch. One would think with UFOs buzzing TV reporters and thousands of eyewitnesses with PHDs in every field, pilots, air traffic controllers etc. there would be a strong interest in the ranch yet in fact it is entirely the opposite going as far as suppressing or ignoring the events altogether by major conference organizers and talk show hosts.

The number one question when people come here and see the ships, experience the higher consciousness and energy experiencing spontaneous healings and incredible awakenings is why is this

not getting out to others. Why is the spiritual and UFO community not jumping all over this. My only answer is ask them what they are afraid of. Why do they have so much resistance to the truth and what is it in them that is threatened? They have become wrong they set out to right. Twenty three million people watched the trailer to the movie Contact Has Begun, His Story with James Gilliland and now it is on Net Flicks. Robbie Williams the UK pop star and other UK stars have come to the ranch. The Latin countries are blasting the contacts and sightings here all over their media and four ships came in all at once at the last Science, Spirit and World Transformation conference filmed by the speakers along with a field full of people. It is blasted all over youtube. Fox News just did a real positive piece and this Thursday KOIN 6 will air their report where a UFO buzzed the reporter at ECETI and powered up right over his head. Despite the UFO community the truth is flowing like a river but not through their venue. It is time for people to do their own research and look into those in the UFO community who have maintained their integrity in a search for truth. Those that continue to keep you looking in the past, painting dark foreboding fearful agendas without

addressing the benevolent side of contact are doing a grave injustice to the people, the off worlders, and the possibility of a quantum leap in evolution. To me this is not a service to humanity but in some cases an extreme disservice which is why I will no longer seek these venues to serve humanity or the greater family of man.

You have my permission to copy and send this far and wide."

James Gilliland
