I just watched it and think Greer did a great job.👍
 The remarks by the Stanford researcher re the tiny being were inconclusive, but he can be forgiven for being scientific, which is his job, after all.
 Hopefully more will be known in time as to the real nature and origins of the being.
 But it has opened a window, and that's important.

The rest of the documentary, the eyewitnesses, history, technology demos, etc. was impressive, imho.
 Just one thing I would have omitted, which was a short vid clip of a man trying to dive into a frozen swimming pool, presented as an illustration of the prevailing ignorance of the majority of the population.
 It was out of place, I thought, but there is a saying about there being wisdom in making a thing imperfect.

I thought I would post it so others could get a chance to see it as well.

It is a good day to wake the fuck up

Well for what it is worth.....I think that guy Steven Greer is not as sincere as he makes out.
Why would he not just let the world watch the video without needing to have people pay
\$10 to see it.

It was a low tech video and he produced it from donations.

Furthermore.....I wish to add some inside information from on of the people that have been to his seminars.

The letter follows in the quote.

Quote:

Since there has been much talk of the Sirius documentary of late, I consider it important to assess the man behind the documentary. I'm especially concerned as The Allies of Humanity detail that there are human operatives working to further the alien intervention's goals. I believe Greer is one of them.

You may be familiar with his CE-5 Initiative events where he charges money to take people out in hopes of initiating contact with a UFO. A person who partook in one of these events posted this review on amazon.com. It confirmed my worries about Dr. Greer, and felt compelled to share it with all of you.

-

Knowledge Seeker's review of Hidden Truth, Forbidden Knowledge:

"During his CSETI workshop I was dismayed at the real Dr. Greer, November 15, 2009 By Knowledge Seeker (California) - See all my reviews

I followed Dr. Greer's activities with enthusiasm since 2001 when he established the Disclosure Project. I read his books, watched his interviews and listened to his meditation CD's. I liked everything the man seemed to be about and shared his views on the need to inform the public about the presence of extraterrestrial visitors on Earth, the importance of establishing peaceful contact with these visitors, in developing free or low cost overunity energy technologies that would clean the planet, eliminate conflict between nations, and bring about a dignified quality of life and abundance to people all over the world. I still share these goals.

So it was with great excitement that I signed up for a CSETI presentation and a one day workshop with Dr. Greer that took place on November 13 and 14, 2009 in Costa Mesa, California to experience and learn CSETI's contact protocol and to determine whether it would be worthwhile enrolling in a week long CSETI outing with Dr. Greer. Surprisingly, my pre-conceived opinion about Dr. Greer's character began to disintegrate as I listened to his presentation. It was disheartening to discover he is excessively fascinated with himself, prone to indulge in name dropping and in bragging about his fantastic 'high end' and/or 'in the know' contacts and connections, not to mention the multitude of outlandish remarks he makes with a straight face, such as his impact on the rogue MAJESTIC secret government. So much so, that according to him, he "rejected a TWO BILLION dollars payout to shut up and abandon the ET disclosure issue".

Needless to say, that night I left the auditorium less enthusiastic about what Dr. Greer is all about. But it was not until the workshop and the outing next day that my opinion about him really changed - unfortunately for the worst.

Again, during the workshop Dr. Greer devoted some time to self admiration while attempting to appear humble by saying, "I'm just a country doctor from North Carolina". By then, I was becoming quite uncomfortable about him but as the workshop progressed my discomfort turned into dismay as I watched how rudely he treated some attendees who asked valid questions or made harmless remarks but whose timing or subject he deemed "inappropriate". I

was truly shocked and could not believe my ears and eyes as I watched him lash at them with such scornful contempt. It was so bad that I wondered if this man was consciously trying to chase these people away. Dr. Greer claims to have experienced meditative Samadhi or oneness with all. If so, one would think he would have achieved a certain degree of enlightenment and a sense of kinship toward his fellow men. Why then was he so harsh and unkind? Did he forget these people paid a significant amount of money not only to listen but to ask questions as well?

The worst and most disheartening part of this experience was witnessing the CSETI's field contact protocol. At the site, a number of devices such as a radio transmitter, magnetometer, radar detectors, infrared scope, etc. were arranged. Even though I don't doubt Dr. Greer may have had several ET experiences in the past, what I observed in the field that night is inconsistent with his hyperbolic claims suggesting he can vector ETs and make them appear. His actions and the facts demonstrated that at the very least this is a bold exaggeration. Not surprisingly, to cover up for this assertion Dr. Greer made sure to bring out a series of possibilities for a 'no show' prior to the field excursion. According to him, sometimes the ETs might not appear because, "there is someone in the group without good intent and a clean heart" or "the ETs feel threatened by US military" or "even though they won't fully materialize they will manifest in a thousand other ways".

Conveniently, there were plenty of people at hand, mostly staff, who would come forward to state that while meditating they saw this or heard that. Most amusing though were Dr. Greer's remarks at the beeps and sounds made by his electronic equipment. You see, according to him an ET he named Walter communicates via one of these electronic devices and Dr. Greer is able to recognize which beeps he makes. Additionally, the large quantity of "WOW!" and "Oh my God!" remarks coming out of Dr. Greer's mouth over unseen or imaginary nonevents was sadly hilarious. Often times he would point his mega laser beam at some spot in the sky and claim he was seeing a partly materialized ET craft. Of course, any one else saw nothing even though, according to him, many significant events were taking place that night because "we were such a great group". To make matters worse, Dr. Greer supplemented the lack of any occurrence with information he received via "remote viewing".

I found this charade insulting to my intelligence, intuitiveness and psychic sensibilities. I know ETs were not present that night and I would have respected Dr. Greer if he had been forthright and acknowledged the fact that there was no activity. I would understand; it happens.

Because I experienced first hand Dr. Greer's tendency to fabricate, exaggerate and embellish nonevents at the CSETI field trip, it then follows that the accuracy and validity of everything he claims in his books is in question since it's evident that, at the very least, he stretches the truth to the point where it becomes short of being an outright lie.

In the past, whenever I would read negative reviews about Dr. Greer, especially ones describing him as a self centered narcissist, I would reject them and conclude they were made by people who couldn't handle the truth. But based on what I saw and experienced first hand, it appears Dr. Greer is in love with himself, and because he sees himself above others, he dislikes most people. However, he desperately craves attention so he created this ET disclosure platform to attract as large an audience as possible in order to obtain the recognition and adulation he sorely needs. In essence, regardless of the message, this messenger is so flawed one must question the purity and true nature of his motivations. His books, conferences and CSETI outings may be more about the money they bring than the message itself.

Furthermore, unless you enjoy watching people being mistreated by Dr. Greer

and don't mind embarking on a pathetic farce, I recommend you put your money elsewhere instead of spending it in any of his CSETI's excursions.

UPDATE 12/4/2009: In a letter sent to Dr. Greer, CIA director James Woolsey, his wife Suzanne, and two others, refute Dr. Greer's claims regarding his alleged "briefing" to them. To read this letter in its entirety please google: greer woolsey ufo watch dog.

Also, astronaut Ed Mitchell refutes claims made by Dr. Greer in Jeff Rense's website. To read Mitchell's statement please google: ed mitchell unhappy with greer. "

I just believe we need to see all information...including what people close to Greer have to say about him.

Yes, all this is not new to me. I just tried to find info about this Greer fellow I have picked up over time. I coulda swore I had made a 'steven greer file' but cannot see it so it may be in another one. If i come across it I will add it.

For one he is a muscle mary, and they are usually narcissistic--posing in front of mirrors and what have you, and their need for their pumped up bodies is often to compensate for how they feel inside.

To me he is a shyster, speeling out these broken-record anecdotes and name-dropping to just spin this tale. he had TWO so-called projects titled differently where he was begging for LOTS of money from people, claiming that because the powers that be are against it, 'we the people' must fund the free energy technology. NOT ONE fuking gasdget as come from this. God knows how much money he, and whoever is part of the scam has got, and IF it were true he knew a Rockefeller why would he even HAVE to ask the 'cattle' or 'useless eaters'(which is supposed what the elite thinks of us) anyhow??!

In that film I was more interested hearing about those other inventors etc, and had paused it at the past mid-way poart where I was seeing witnesses describe their UFO encounters. But your right---we have every reason to question this man Greer, and his INCESSANT need for our money.

I definitely dig that he is bringing about more awareness about other intelligent life forms in our multi universe having visitation and interaction on our world.

Awareness on this subject is always a benefit.

Unfortunately the man is like the rest of us, flawed with being a human being.

Us human beings are not a very intelligent or intellectual entity.
We certainly were not designed for intelligence at all.
Our ignorance and fears often over power our ability to use common sense and reasoning. We have a terrible memory, and it is only short term.

I can't fault him for being human, but I can try to understand better what motivates him to give a damn to spread awareness.

For one thing you and I have to admit, it takes a heck of a lot of balls to take a stand on anything and go public as an advocate.

Historically, we tend to kill the messenger. 😞

It was a great documentary in my opinion. My father and I watched it and it hit all the key points in a skillful way, weaving the major conspiracies into a rather masterful narrative. It is well worth a watch. In my opinion the debate about whether or not alien extraterrestrial life is present on earth is over. The preponderance of evidence is absolutely overwhelming. Non-human intelligent beings are here and have been for a long time. Anyone who denies this at this point is in my opinion in a similar position to those who argued that the sun revolved around the earth after Galileo proved otherwise. To say humans are alone in the universe and that no extraterrestrial craft are in our skies is like arguing the world is flat.

Some people just haven't don't the research yet, so they are ignorant of the evidence, which is fair enough, not everyone has time to learn the truth.

Many others are just profoundly uncomfortable with the truth and prefer to deny it for that reason.

I highly recommend the documentary "the day before disclosure". It is absolutely superb and in my opinion it is the best documentary to show to someone who does not yet know or believe in the alien presence. It will convince anyone with an open mind.

Looks like they're pulling a lot of these down. There are quite a number of torrents available. And as someone pointed out in a comment on the piratebay:

Quote:

I also find it funny this movie preaches against the rich keeping people from free information and intuitive developments, yet they themselves are suppressing the information you and I payed to have, but only at a cost.[

...which I found kind of amusing.

This link seems to work...for now:

I am me. We are You.

OK I now have completed watching the full video! Thanks.

Some questions: Some here claim that they feel chated in having to pay to watch it. Can you remind me what Greer was asking for to fund this video, and did he promise it was gonna be free? I am curious.

ALSO does anyone know whay he likes to call his site Sirius and this movie is called Sirius.

I ask because the other day I was reading an explanation of the Great Seal which is on the dollar bill etc of the Pyramid and ALL-Seeing-Eye, and it said that the light source shoing behind the eye was not the sun but Sirius, and thus everyone is carrying a symbol glorifying the Illuminati's favoured luminary. So I am wondering when Greer uses that luminary for his stuff? Anyone know?

I dont know much about Sirius other than that it is called "the dog star" for some reason. Greer, in principle, has as much right to charge for his creative work as any hollywood movie company, but as with any hollywood movie, I would rather pirate a free copy.

Along with the Pleiades, Orion, and Zeta Reticulli, Sirius seems to be a preferred theory for the origin of some extraterrestrials, but I have no idea why.

Overall I enjoyed the documentary, and anticipated it for a while after listening to the Joe Rogan podcast where he was a guest. I totally appreciate the documentary, however the funding issue is one that I really can't get my head around.

I understand people have to be paid and stuff like that, but once the documentary was already paid for by donations, it takes a lot of audacity to then charge the public yet again for something they have already paid for. If it wasn't for that issue I would hold Steven Greer in a much higher regard. I still very much respect him and am grateful for his work, but the money issue is a little too much for me to fathom. It really takes away from the credibility of the whole project in my opinion, especially for something they want to be considered as a "disclosure", it's not much a disclosure if you have to pay for the privilege.

Not only that, but they were so aggressive at taking down pirated copies on the internet, it makes me ask "what's more important, the disclosure or the money?".

They who can give up essential liberty to obtain a little temporary safety, deserve neither liberty nor safety.

- Benjamin Franklin

I liked how around 25 minutes in he described his near death experience from when he was 17. He said he was in deep space and felt a oneness with EVERYthing...

Sounds alot like a DMT trip to me. Maybe there might be some truth to the "theory" that DMT is produced in the pineal gland and sent out near death... Just maybe

I am a pathological liar. Anything I say is a complete lie!

Don't Trip On Your Open Mind

CSETI Guru Greer's Claim Of ET/UFO Briefing From CIA Director Disputed

by: Royce Myers, III

for your perusal...

In Stephen Greer's book, Extraterrestrial Contact, Greer claimed to have been directly briefed about UFOs by R. James Woolsey, the former director of the CIA, at a dinner party. Shortly after Greer published his book with his apparently exaggerated account of what had taken place, Woolsey and others present at the dinner sent Greer a letter trying to set the record straight. While this is old news, ufowatchdog.com recently received a copy of the letter that, as far as I know, has never been published on the Internet. We present this letter here

R. JAMES WOOLSEY
SUITE 800
1800 MASSACHUSETTS AVENUE, N.W.
WASHINGTON, D.C. 20036

JOHN L. PETERSEN
SUITE 204
1501 LEE HIGHWAY
ARLINGTON, VIRGINIA 22209

September 16, 1999

Steven M. Greer, M.D.
International Director
Center for the Study of Extraterrestrial Intelligence
P.O. Box 265
Crozet, Virginia 22932

Dear Dr. Greer:

It has just come to the attention of the four of us that you have, without giving any of us the opportunity to comment, published a distorted account of a dinner party of some six years ago at which the four of us, you, and your wife were seated together.

In the Introduction to your book, Extraterrestrial Contact, published earlier this year you portray this dinner party conversation during which the four of us listened to your views and politely asked questions as a "briefing" with a "cover story." You further assert that Mr. and Mrs. Woolsey reported a UFO sighting to you and agreed with your views. You include specific alleged quotations from them.

None of this is accurate. You have portrayed politeness as acquiescence and questions as affirmations. Your conduct in this matter contravenes both accuracy and simple manners.

Sincerely,

John L. Petersen

Diane C. Petersen

Ed Mitchell Most Unhappy With Greer Using His Name As Disclosure Witness

From Dr. Jack Sarfatti sarfatti@well.com

Subject: Astronaut Ed Mitchell on Washington Times story of the
Greer UFO Disclosure Conference

To: Edgar Mitchell

Organization: Internet Science Education Project
5-13-1

***"Steve Greer...began to overreach his data continuously"
- Edgar Mitchell***

Edgar Mitchell) Jack, et al: The Washington Times (story)
on UFO disclosure mentions my name as a witness for the
Disclosure Project -- which I am not ...and have not been.

(Jack Sarfatti) I am not surprised at all. If you look to see
who is running that CSETI Horse and Pony Disinfo Show &
Tell you will recognize familiar names. Consider the source.
As a Navy man and NASA Astronaut who really was Out
There, you know what I mean. :-)

(Edgar Mitchell) I cooperated with Steve Greer some years
ago, but he began to overreach his data continuously,
necessitating a withdrawal by myself, and, I believe, several
others. I have requested to be removed from any web site,
announcements, etc., but see that has not taken place.

(Jack Sarfatti) Typical of politically-based influence
operations. The real motive of the Press Club Event was the

issue of militarization of space not UFOs, on which reasonable well meaning people can differ of course. Since many millions of voters believe UFOs are real, getting control of the UFO movement clearly is a top priority for all the players.

(Edgar Mitchell) Although I firmly believe it is time for openness and disclosure by government, I object to being misused in this fashion and acquire guilt by association with certain claims that simply are not true.

(Jack Sarfatti) I feel exactly as you do. I think you, Don Ecker and I see it eye-to-eye on this one.

(Edgar Mitchell) I, nor any crew I was on (I was on three Apollo crews), received any briefing before or after flights on UFO events, saw anything in space suggesting UFOs or structures on the moon, etc. We did it just like we said in official reports. My only claim to knowledge of these events is from the individuals, mostly of yesteryear, who were in government, intelligence, or military; were there, saw what they saw, and now believe it should be made public. But I claim no first hand knowledge, nor have any. Pass it on to the rest of the net, if you will.

--Edgar Mitchell

(Jack Sarfatti) Is The Pope Catholic? Pass it on. I certainly will. :-)

'Disclosure Project' Oversteps Bounds

From Jason Leigh jasonsos@digitex.net
5-14-1

To all,

First, thanks to Dan of UFOzone for sending me this article:
<http://www.rense.com/general10/mitch.htm> from Jeff
Rense's one-of-a-kind excellent world news website.

Second: Dr. Steven Greer used my copyrighted UFO videos to sell, promote and include in his past 'paid public lectures,' without my expressed permission.

He showed my stated UFO video tape (of June 11, 1995, (c) by Jason Leigh) to the U.S. Congress in 1997, as was verified by Dr. Bob Hieronimus (and was mentioned to my surprise on one of our 'on-air' radio interviews), who was present at that U.S. Congress meeting conducted by Dr. Greer, again: without my written, or expressed permission. A blatant copyright infringement . . .

I wrote to Dr. Greer, who at first, denied having ever showed this footage, but then recanted when I wrote him back and related what Dr. Bob Hieronimus had told me, stating that he (Dr. Greer) had, "forgotten."

Now, I certainly didn't mind--and was actually proud that my UFO footage was included in the presentation to the U.S. Congress back in 1997, but NOT when it was used in 'paid lectures' presented to the public and was also included in his UFO promotional videotape--which was also 'sold' for purposes for profit, or monetary gain: yet another copyright infringement.

Since the amazing broad daylight UFO was videotaped by me on June 11, 1995, I have invested over \$5,000 to date to present this 'proven' footage to the world--for free. But when another would take (or steal) this copyrighted footage and profit from it without so much as a 'howdy do' to me, it certainly would have put most anyone in a mood of discontent.

It seems that the stories we have all heard of Dr. Greer and his 'non-profit' organization ('non-profit' meaning he does not offer any moneies towards charites--only towards the 'Disclosure Project') 'using' other people's research, names and photographs to promote his own project is such a derogatory issue, that we should all be infuriated by this inexcusable conduct.

I, for one, am bewildered at the attentions he has been able to reap via the paranormal and major media in his

'Disclosure Project,' which should have a post-script to it by giving credit where credit is due to the many HUNDREDS of people he has used as well as the above mentioned thief and misuse of other people's work and names, usually, and apparently: without their consent. He should be brought up on charges for his illegal actions in an attempt to force the U.S. government to admit to the reality of UFOs, but this would just bring yet another collective 'black eye' to this field of research, which is scared enough by the countless others who have perpetrated hoaxes and lies, most assuredly for personal profit and gain.

Will I sue Dr. Greer for infringing upon, and profiting from, my copyrighted video of the UFO? I am not sure at this point, although others in this field have suggested that I should--and must.

What say ye?

I affirm that the above is true, and correct. Jason Leigh

Dear Mr. Bassett:

With respect, the majority of the MUFON members who we surveyed believed the Greer "Disclosure Project" was unsuccessful. Moreover, most thought it set back Ufology. Here were some of their reasons:

Ufology was mixed with other issues -- like Space Based defense deployment. Space systems are a primary focus of the Bush administration. And, are were to think that sworn officers and esteemed graduates of West Point, Annapolis and the Air Force Academy are dupes who do not hold the U.S. public's interest in defense matters?

Witnesses were publicly known prior to the disclosure -- none were insiders. Only one person that he eye-witnessed (ET) alien bodies. When asked what ETs looked like, Clifford Stone's statement was ludicrous. Mr. Bassett, were these the best of 400 witnesses that Dr. Greer vetted?

ET's are not hostile... What then do we do with the work of

Dr. Jacobs (and 50 years of UFO/ET studies by other researchers), abductees, ET hybrids, implants, cattle, human mutilations and hostile acts (Brazil and South Africa).

Mr. Bassett, unless Congress acts, your new Paradigm Clock setting at 11:59 PM should be reconsidered...

Respectfully,
Jerry Glass,
Director MUFON
Riverside County, CA
