"Usire" redirects here. For the 2001 film, see Usire (film).

Osiris (/oʊˈsaɪrəs/, or Usiris; also Ausar), is an Egyptian god, usually identified as the god of the afterlife, the underworld and the dead. He was classically depicted as a green-skinned man with a pharaoh's beard, partially mummy-wrapped at the legs, wearing a distinctive crown with two large ostrich feathers at either side, and holding a symbolic crook and flail.

Osiris was at times considered the oldest son of the earth god Geb, and the sky goddess Nut, as well as being brother and husband of Isis, with Horus being considered his posthumously begotten son. He was also associated with the epithet Khenti-Amentiu, which means "Foremost of the Westerners" — a reference to his kingship in the land of the dead.\(^1\) As ruler of the dead, Osiris was also sometimes called "king of the living", since the Ancient Egyptians considered the blessed dead "the living ones".\(^2\) Osiris was considered the brother of Isis, Set, Nephthys, Horus the Elder and father of Horus the younger.\(^3\) Osiris is first attested in the middle of the Fifth dynasty of Egypt, although it is likely that he was worshipped much earlier;\(^4\) the term Khenti-Amentiu dates to at least the first dynasty, also as a pharaonic title. Most information available on the myths of Osiris is derived from allusions contained in the Pyramid Texts at the end of the Fifth Dynasty, later New Kingdom source documents such as the Shabaka Stone and the Contending of Horus and Seth, and much later, in narrative style from the writings of Greek authors including
Osiris was considered not only a merciful judge of the dead in the afterlife, but also the underworld agency that granted all life, including sprouting vegetation and the fertile flooding of the Nile River. He was described as the "Lord of love", "He Who is Permanently Benign and Youthful" and the "Lord of Silence". The Kings of Egypt were associated with Osiris in death — as Osiris rose from the dead they would, in union with him, inherit eternal life through a process of imitative magic. By the New Kingdom all people, not just pharaohs, were believed to be associated with Osiris at death, if they incurred the costs of the assimilation rituals.

Through the hope of new life after death, Osiris began to be associated with the cycles observed in nature, in particular vegetation and the annual flooding of the Nile, through his links with the heliacal rising of Orion and Sirius at the start of the new year. Osiris was widely worshipped as Lord of the Dead until the suppression of the Egyptian religion during the Christian era.

**Etymology of the name**

*Osiris* is a Latin transliteration of the Ancient Greek: Ὄσιρις, which in turn is the Greek adaptation of the original theonym in the Egyptian language. In Egyptian hieroglyphs the name is written Wšjr, as the hieroglyphic writing does not restitute all the vowels, and Egyptologists transliterate the name variously as Asar, Asari, Aser, Ausar, Ausir, Wesir, Usir, Usire or Ausare.

Several proposals have been made for the etymology and meaning of the original name Wšjr. John Gwyn Griffiths (1980) proposed a derivation from wser signifying "the powerful". Moreover, one of the oldest attestations of the god Osiris appears in the mastaba of the deceased Netjer-wser (God Almighty).

David Lorton (1985) proposed that Wšjr is composed by the morphemes set-jret signifying "ritual activity", Osiris being the one who receives it. Wolfhart Westendorf (1987) proposed an etymology from Waset-jret "she who bears the eye".

**Appearance**

Osiris is represented in his most developed form of iconography wearing the Atef crown, which is similar to the White crown of Upper Egypt, but with the addition of two curling ostrich feathers at each side (see also Atef crown (hieroglyph)). He also carries the crook and flail. The crook is thought to represent Osiris as a shepherd god. The symbolism of the flail is more uncertain with shepherds whip, fly-whisk, or association with the god Andjety of the ninth nome of Lower Egypt proposed.

He was commonly depicted as pharaoh with a complexion of either green (the color of rebirth) or black (alluding to the fertility of the Nile floodplain) in mummiform (wearing the trappings of mummmification from chest downward). More rarely, he was depicted as a lunar god with a crown encompassing the moon.
Early mythology

The Pyramid Texts describe early conceptions of an afterlife in terms of eternal travelling with the sun god amongst the stars. Amongst these mortuary texts, at the beginning of the 4th dynasty, is found: "An offering the king gives and Anubis". By the end of the 5th dynasty, the formula in all tombs becomes "An offering the king gives and Osiris".\[^{13}\]

Father of Horus

Osiris is the mythological father of the god Horus, whose conception is described in the Osiris myth, a central myth in ancient Egyptian belief. The myth described Osiris as having been killed by his brother Set, who wanted Osiris' throne. Isis joined the fragmented pieces of Osiris, but the only body part missing was the phallus. Isis fashioned a golden phallus, and briefly brought Osiris back to life by use of a spell that she learned from her father. This spell gave her time to become pregnant by Osiris before he again died. Isis later gave birth to Horus. As such, since Horus was born after Osiris' resurrection, Horus became thought of as a representation of new beginnings and the vanquisher of the evil Set.

Ptah-Seker (who resulted from the identification of Ptah with Seker), god of re-incarnation, thus gradually became identified with Osiris, the two becoming Ptah-Seker-Osiris. As the sun was thought to spend the night in the underworld, and was subsequently re-incarnated every morning, Ptah-Seker-Osiris was identified as both king of the underworld, and god of reincarnation.

Ram god

Osiris' soul, or rather his Ba, was occasionally worshipped in its own right, almost as if it were a distinct god, especially in the Delta city of Mendes. This aspect of Osiris was referred to as Banebdjedet, which is grammatically feminine (also spelt "Banebed" or "Banebdjed"), literally "the ba of the lord of the djed, which roughly means The soul of the lord of the pillar of continuity. The djed, a type of pillar, was usually understood as the backbone of Osiris, and, at the same time, as the Nile, the backbone of Egypt.

The Nile, supplying water, and Osiris (strongly connected to the vegetation) who died only to be resurrected, represented continuity and stability. As Banebdjed, Osiris was given epithets such as Lord of the Sky and Life of the (sun god) Ra, since Ra, when he had become identified with Atum, was considered Osiris' ancestor, from whom his regal authority is inherited. Ba does not mean "soul" in the western sense, and has to do with power, reputation, force of character, especially in the case of a god.

Since the ba was associated with power, and also happened to be a word for ram in Egyptian, Banebdjed was depicted as a ram, or as Ram-headed. A living, sacred ram, was kept at Mendes and worshipped as the incarnation of the god, and upon death, the rams were mummified and buried in a ram-specific necropolis. Banebdjed was
consequently said to be Horus' father, as Banebdjed was an aspect of Osiris.

Regarding the association of Osiris with the ram, the god's traditional crook and flail are the instruments of the shepherd, which has suggested to some scholars also an origin for Osiris in herding tribes of the upper Nile. The crook and flail were originally symbols of the minor agricultural deity Andjety, and passed to Osiris later. From Osiris, they eventually passed to Egyptian kings in general as symbols of divine authority.

Mythology

The family of Osiris. Osiris on a lapis lazuli pillar in the middle, flanked by Horus on the left and Isis on the right (22nd dynasty, Louvre, Paris)

The cult of Osiris (who was a god chiefly of regeneration and rebirth) had a particularly strong interest in the concept of immortality. Plutarch recounts one version of the myth in which Set (Osiris' brother), along with the Queen of Ethiopia, conspired with 72 accomplices to plot the assassination of Osiris. Set fooled Osiris into getting into a box, which Set then shut, sealed with lead, and threw into the Nile (sarcophagi were based onWikipedia:Citation needed
Osiris' wife, Isis, searched for his remains until she finally found him embedded in a tamarind tree trunk, which was holding up the roof of a palace in Byblos on the Phoenician coast. She managed to remove the coffin and open it, but Osiris was already dead.

In one version of the myth, she used a spell learned from her father and brought him back to life so he could impregnate her. Afterwards he died again and she hid his body in the desert. Months later, she gave birth to Horus. While she raised Horus, Set was hunting one night and came across the body of Osiris.

Enraged, he tore the body into fourteen pieces and scattered them throughout the land. Isis gathered up all the parts of the body, less the phallus (which was eaten by a catfish) and bandaged them together for a proper burial. The gods were impressed by the devotion of Isis and resurrected Osiris as the god of the underworld. Because of his death and resurrection, Osiris was associated with the flooding and retreating of the Nile and thus with the crops along the Nile valley.

Diodorus Siculus gives another version of the myth in which Osiris was described as an ancient king who taught the Egyptians the arts of civilization, including agriculture, then travelled the world with his sister Isis, the satyrs, and the nine muses, before finally returning to Egypt. Osiris was then murdered by his evil brother Typhon, who was identified with Set. Typhon divided the body into twenty-six pieces, which he distributed amongst his fellow conspirators in order to implicate them in the murder. Isis and Hercules (Horus) avenged the death of Osiris and slew Typhon. Isis recovered all the parts of Osiris' body, except the phallus, and secretly buried them. She made replicas of them and distributed them to several locations, which then became centres of Osiris worship.

Death and institution as god of the dead

Plutarch and others have noted that the sacrifices to Osiris were "gloomy, solemn, and mournful..." (Isis and Osiris, 69) and that the great mystery festival, celebrated in two phases, began at Abydos commemorating the death of the god, on the same day that grain was planted in the ground (Isis and Osiris, 13). "The death of the grain and the death of the god were one and the same: the cereal was identified with the god who came from heaven; he was the bread by which man lives. The resurrection of the god symbolized the rebirth of the grain."

The germinating seed symbolized Osiris rising from the dead. An almost pristine example was found in the tomb of Tutankhamun by Howard Carter.

The first phase of the festival was a public drama depicting the murder and dismemberment of Osiris, the search of his body by Isis, his triumphal return as the resurrected god, and the battle in which Horus defeated Set. This was all presented by skilled actors as a literary history, and was the main method of recruiting cult membership.

According to Julius Firmicus Maternus of the fourth century, this play was re-enacted each year by worshippers who "beat their breasts and gashed their shoulders.... When they pretend that the mutilated remains of the god have been found and rejoined...they turn from mourning to rejoicing." (De Errore Profanorum).
The passion of Osiris was reflected in his name 'Wenennefer' ("the one who continues to be perfect"), which also alludes to his post mortem power.

**Ikhernofret Stela**

Much of the extant information about the Passion of Osiris can be found on the Ikhernofret Stela at Abydos erected in the 12th Dynasty by Ikhernofret (also I-Kher-Nefert), possibly a priest of Osiris or other official (the titles of Ikhernofret are described in his stela from Abydos) during the reign of Senwosret III (Pharaoh Sesostris, about 1875 BC). The Passion Plays were held in the last month of the inundation (the annual Nile flood, coinciding with Spring, and held at Abydos/Abedjou which was the traditional place where the body of Osiris/Wesir drifted ashore after having been drowned in the Nile.

The part of the myth recounting the chopping up of the body into 14 pieces by Set is not recounted in this particular stela. Although it is attested to be a part of the rituals by a version of the Papyrus Jumilhac, in which it took Isis 12 days to reassemble the pieces, coinciding with the festival of ploughing.[21] Some elements of the ceremony were held in the temple, while others involved public participation in a form of theatre. The Stela of I-Kher-Nefert recounts the programme of events of the public elements over the five days of the Festival:

- **The First Day, The Procession of Wepwawet**: A mock battle was enacted during which the enemies of Osiris are defeated. A procession was led by the god Wepwawet ("opener of the way").
- **The Second Day, The Great Procession of Osiris**: The body of Osiris was taken from his temple to his tomb. The boat he was transported in, the "Neshmet" bark, had to be defended against his enemies.
- **The Third Day**: Osiris is Mourned and the Enemies of the Land are Destroyed.
- **The Fourth Day, Night Vigil**: Prayers and recitations are made and funeral rites performed.
- **The Fifth Day, Osiris is Reborn**: Osiris is reborn at dawn and crowned with the crown of Ma'at. A statue of Osiris is brought to the temple.

**Wheat and clay rituals**

Contrasting with the public "theatrical" ceremonies sourced from the I-Kher-Nefert stele (from the Middle Kingdom), more esoteric ceremonies were performed inside the temples by priests witnessed only by chosen initiates. Plutarch mentions that (for much later period) two days after the beginning of the festival "the priests bring forth a sacred chest containing a small golden coffer, into which they pour some potable water...and a great shout arises from the company for joy that Osiris is found (or resurrected). Then they knead some fertile soil with the water...and fashion therefrom a crescent-shaped figure, which they cloth and adorn, this indicating that they regard these gods as the substance of Earth and Water." (Isis and Osiris, 39). Yet his accounts were still obscure, for he also wrote, "I pass over the cutting of the wood" - opting not to describe it, since he considered it as a most sacred ritual (Ibid. 21).

In the Osirian temple at Denderah, an inscription (translated by Budge, Chapter XV, Osiris and the Egyptian Resurrection) describes in detail the making of wheat paste models of each dismembered piece of Osiris to be sent out to the town where each piece is discovered by Isis. At the temple of Mendes, figures of Osiris were made from wheat and paste placed in a trough on the day of the murder, then water was added for several days, until
finally the mixture was kneaded into a mold of Osiris and taken to the temple to be buried (the sacred grain for these cakes were grown only in the temple fields). Molds were made from the wood of a red tree in the forms of the sixteen dismembered parts of Osiris, the cakes of 'divine’ bread were made from each mold, placed in a silver chest and set near the head of the god with the inward parts of Osiris as described in the Book of the Dead (XVII).

On the first day of the Festival of Ploughing, where the goddess Isis appeared in her shrine where she was stripped naked, paste made from the grain were placed in her bed and moistened with water, representing the fecund earth. All of these sacred rituals were "climaxed by the eating of sacramental god, the eucharist by which the celebrants were transformed, in their persuasion, into replicas of their god-man" (Larson 20). Judgement

The idea of divine justice being exercised after death for wrongdoing during life is first encountered during the Old Kingdom, in a 6th dynasty tomb containing fragments of what would be described later as the Negative Confessions.[22]

With the rise of the cult of Osiris during the Middle Kingdom the "democratization of religion" offered to even his humblest followers the prospect of eternal life, with moral fitness becoming the dominant factor in determining a person's suitability.

At death a person faced judgment by a tribunal of forty-two divine judges. If they led a life in conformance with the precepts of the goddess Ma'at, who represented truth and right living, the person was welcomed into the kingdom of Osiris. If found guilty, the person was thrown to a "devourer" and didn't share in eternal life.[23]

The person who is taken by the devourer is subject first to terrifying punishment and then annihilated. These depictions of punishment may have influenced medieval perceptions of the inferno in hell via early Christian and Coptic texts.[24]

Purification for those who are considered justified may be found in the descriptions of "Flame Island", where they experience the triumph over evil and rebirth. For the damned, complete destruction into a state of non-being awaits, but there is no suggestion of eternal torture.[25]

Divine pardon at judgement was always a central concern for the Ancient Egyptians.[26]

During the reign of Seti I, Osiris was also invoked in royal decrees to pursue the living when wrongdoing was observed, but kept secret and not reported.[27]
Osiris

Greco-Roman era

Hellenisation

Eventually, in Egypt, the Hellenic pharaohs decided to produce a deity that would be acceptable to both the local Egyptian population, and the influx of Hellenic visitors, to bring the two groups together, rather than allow a source of rebellion to grow. Thus Osiris was identified explicitly with Apis, really an aspect of Ptah, who had already been identified as Osiris by this point, and a syncretism of the two was created, known as Serapis, and depicted as a standard Greek god.

Destruction of cult

The cult of Osiris continued until the 6th century AD on the island of Philae in Upper Nile. The Theodosian decrees of the 390s, to destroy all pagan temples, were not enforced there. The worship of Isis and Osiris was allowed to continue at Philae until the time of Justinian, by treaty between the Blemmyes-Nobadae and Diocletian. Every year they visited Elephantine, and at certain intervals took the image of Isis up river to the land of the Blemmyes for oracular purposes. The practices ended when Justinian I sent Narses to destroy sanctuaries, arrest priests, and seize divine images, which were taken to Constantinople.[28]

Notes

[3] Kane Chronicles
As for anyone who shall avert the face from the command of Osiris, Osiris shall pursue him, Isis shall pursue his wife, Horus shall pursue his children, among all the princes of the necropolis, and they shall execute their judgment with him. (Breasted Ancient Egyptian Records, Vol 3, p. 86)
