

Screen Memories

After seeing this UFO I started noticing some weird things. I was having strange dreams (I will get into that more later) and I started having encounters with Owls. Why owls? I have no idea....

I often get into the habit of staying up till 3-4 in the morning reading or painting. On this night I was in bed reading when I heard a couple owls outside my window. This didn't seem unusual to me. The second night however, I was awoken by these owls because they sounded unfamiliarly close to my window. When I looked outside they were sitting on the balcony outside my door. They returned for three more nights, and on the fourth night I had the strangest "dream". I had dreamed that I had once again been awakened by the owls, and that I went outside to shoo them away....

Owls, deer, and cats are common screen memories in abductions....

Many alien abductees report seeing Owls. The thing is you are really not seeing an owl, you are seeing a screen that the Aliens have put there. When they do an abduction that is extremely invasive, like take your eggs or ovaries, the wipe your memory and replace it with a "screen memory" So every time your mind try to recover the old memory (the real memory) You will see an owl.
