**The Good, the Bad, and the Ugly of the UFO Scene
With all the fiction and disinformation circulating in ufology, it seems useful to catalogue some of the good**

leaders in the field, and distinguish them from those who are not to be trusted.

What follows is a listing of “the Good, the Bad, and the Ugly of UFOlogy”, found on the Internet, with which

I find no disagreement.

Beneath this list, you will find a Quick Test For Disinformation, that can help you sort out many false UFO writings.

half-century old crash instead of current Star Visitor contacts

- Uri Geller, Israeli psychic fake “spoon-bender” and Cabal mole within the metaphysical community falsely claiming to have been “taught by extraterrestrials”

- Christopher Kit Green, M.D., Ph.D., General Motors officer, ex-top CIA UFO official, ex-head, Bigelow's NIDS Institute's Scientific Advisory Board

- George Green: a disinformation peddler who claims that while in the Air Force he saw extraterrestrial craft at Edwards AFB, claims to be in contact with "ETs", but Star Visitors want nothing to do with this dark-energy liar.

- Steven Greer, director, CSETI, UFO “investigator”; exhibits an extremely- negative personal-energy signature, detectable as such with dowsing rods. Greer has a history of being financed by Rockefeller interests. The gathering of military and government witnesses to UFOs, whom he gathered for a press conference at which he took hugely- disproportionate time time speaking, contained among it a carefullyselected

disproportionate number of persons who had absorbed hostile anti-Star Visitor propaganda. The whole emphasis was on “nuts-and-bolts” UFO description, not on presenting the people who come in those

craft and what they have to say. At least one such expert, David Adair, with such Star Visitor communication

knowledge was excluded from the press conference when Greer learned that he might speak up about that. Greer leads night watches with the misleading premise that it takes flashlights and special “recorded UFO

tones” to lure in UFOs. This shows his ignorance, and points to a lack of actual communication contact with the Star Visitors, despite his posturing that he has “had contact.” His SEAS company looks like a vacuuming

operation, to smoke out sincere, naive private inventors of free-energy devices. This also exposes these

inventors to notice by Cabal operatives, who can then neutralize these inventors’ threat to Big Oil and utilities’ monopolistic profits. SEAS has gone nowhere, despite grand promises to have a free-energy device

“on the market in 2005.” For all of these reasons it seems wise not to ignore the warning revealed by his negative energy signature

- Richard Hall, Intelligence mole within Fund for UFO Research

- Budd Hopkins, artist, abductions investigator /disinformer

- David Icke, former newscaster now disinformation lecturer, writer of wacky conspiracy stories about the Star Visitors

 - David Jacobs, Ph.D., historian/ abductions investigator /disinformer

 - Joachim Koch, Cabal UFO disinformation operative
 - Kal Korff, UFO debunker
 - John Lear, Jr., former CIA-operative/disinformer

- The Good, the Bad, and the Ugly - of Ufology
<http://www.drboylan.com/goodbadugly.html>
3 of 7 6/4/2012 4:33 PM
- Bruce Maccabee, Ph.D., Naval Weapons physicist, disinformer
 - Shirley MacLaine, actress and Cabal disinformation mole within the Hollywood metaphysical community
 - Jordan Maxwell: claims falsely to have had a UFO encounter at Area 51, and in Southern California

participated in a hoaxed "UFO" sighting involving a pre-arranged Cabal antigravity device which he "spotted" and was videotaped. A blathering-idiot lecturer who includes UFOs in his rants about conspiracies.

UFO pseudo-information and propaganda

- Gordon Novel, listed as Aviary member; self-described affiliate with foreign intelligence operations

- Ted Oliphant, UFO investigator /Intelligence plant, information gatherer

- Ronald Pandolfi, Deputy Director, Science & Tech Div., CIA, disinformant

- Nick Pope, this former MoD Chief says "U.K. Wide-Open to an Alien Attack" (sic); it's pretty clear that he has been cut loose from MoD to disseminate disinformation more credibly as a "civilian". His strong negative

energy signature clinches the poor diagnosis of Mr. Pope.

- "Rael", actually Claude Vorilhon, is a French hoaxster and possible disinformation asset who falsely claims

to be in communication with a star race called “Elohim” whose leader is supposedly God. His deception operations have spread to French Canada and elsewhere.

- Bill Ryan and Kerry Cassidy deserve to be on the Bad Guys/Gals list because 90% of whom they present

are disinformation operatives, and Ryan and Cassidy are working to make their Project Camelot website a major dispensary of disinformation.

- Michael Salla, Ph.D., investigator, spreads anti-Star Visitor disinformation

- Jack Sarfatti, ex-govt-contract physicist, disinformant, denies UFO reality

- Philip Schneider, government engineer and (perhaps unwitting) spreader of disinformation he had been indoctrinated with during his employment in classified underground installations.

-Rob Simone, radio talk show host and Cabal disinformation/propaganda spreader

- Derrel Sims, ex -CIA operative/ abductions investigator /disinformant

- Zecharia Sitchin, Israeli writer spinning tales of all-too-human-like “Annunaki”. Sitchin published his interpretation of some Sumerian legends about early contact with Visitors from the stars. Unfortunately, Sitchin tends to present Sumerian legends as though they were transcripts from the New York Times.

Actually, ancient Near East literature in its cultural context reflects the faulty understandings and distortions of primitive people faced with sky visitors they thought were “gods”, and then in the countless retellings of these visits, ascribing to the Star Visitors the arrogant, ruthless and scheming qualities of their own human rulers. Thus the legends warped earlier events into almost unrecognizable tales, as these stories got passed down. Some Sumerian language experts hold that Sitchin took liberties with the translation and interpretation of what the original cuneiform text said. The basic premise which Sitchin started from is fact: that Sumerians acknowledged contact from Visitors from the stars who helped establish the foundation for a Human civilization. The rest of Sitchin’s tales, the drama about lust, jealousy and wars, are cultural trappings added on by Sumerian scribes taking literary license. These scribes were confused when accounts of the original activity of the Zeta bioengineers perfecting the Homo Sapiens recipe got mixed up with the intrusions by Cabal types reincarnating from the Atlantis civilization the Cabal had destroyed, and were then trying to

dominate, impress, and oppress the Sumerian peasants with advanced knowledge and technology they remembered and recreated from the Atlantean times. These Sumer-era Cabal ruler-priests passed themselves off as gods-come-down-from-the-sky [*Annunaki*]. Sitchin's interpretation of the confused Sumerian legends as literal fact can be ignored, including his putting forth sensationalistic scare stories about a supposedly inhabited "Marduk"/ "Niburu"/Planet X heading ominously for Earth, (more Cabal psychological- warfare propaganda).

The UGLIES (Ugly =unreliable or distorts UFO facts - a partial list)

QUICK TEST FOR DISINFORMATION

It is the nature of disinformation to be a captious brew of both true and false statements, cleverly interwoven

so that the average reader cannot tell which is which without further research.

Quick Test for Disinformation

Does it paint the Star Visitors in a bad light?

Does it pick a particular star race to disparage?

Does it insinuate bad motives for why the Star Visitors are here?

Does the writer claim to "channel" one or more Star Visitors bearing florid, extravagant, politicized and/or sensationalized messages?

While not comprehensive, the above *Quick Test* will in my estimation filter out about 95% of the disinformation and phony writings on the Internet and in pop magazines.

in the light,
