The recent UFO sightings in the city of Santiago are creating fear among the population, according to a TV news report. On the 30 November 2012, a huge glowing disc and smaller craft were spotted over Santiago, multiple witness's claim the object was massive, possibly the size of a football field, and seemed to glow, it was followed by a smaller craft or orb.

Experts do not know why these unidentified flying objects appear during or after any disaster. What is the relationship between UFOs and natural disasters, catastrophic events such as earthquakes, and why such interest in Santiago, a huge hotspot for UFO activity.

The result of a survey of public opinion in Chile, clearly says that 85% of the population of this country believes in extraterrestrial presence on our planet.

Respond to this video...

To have a lord one must be a slave. Sir I have no lord, I serve only myself. I am my own lord as I am my own servant to myself.

I know for a fact that they arent looking here for a new home here on Earth because there are countless numbers of livable planets that are in a better state then ours, our ice is melting permanently so any intelligent species would not even bother and they most likely arent hostile and there is evidence in the fact that non terrestrial craft have been visiting before airplanes and still have not been known to harm anyone.

Because if it wasn't you would be able to see the "made in China" stamp on the bottom of the plate.

This whole video is like one of the news bulletins from the original Robocop movie - only in Spanish

How can anyone take this rubbish seriously?
