Hebrew

Etymology 1

From שֶׁל־ (*shel'*-, “which [is] to”), which is attested since Mishnaic Hebrew. The standalone form is a more recent innovation, but the pronoun-including forms are unchanged (which may be seen both in their gemination of the ל, and in the unusual forms of the second- and third-person masculine and feminine plural pronominal suffixes, otherwise found only in the inflections of לִי־ (*l'*-) and בִּי־ (*b'*-)).

Preposition

שֶׁל־ • (shel)

1. Of, belonging to, owned by, pertaining to.

Usage notes

- Phrases headed by שֶׁל־ are mostly analogous to English attributive noun phrases and noun phrases plus the clitic *'s*. In particular, while שֶׁל־ often means “of”, phrases headed by שֶׁל־ can only modify noun phrases and similar syntactic entities; adverbial uses of English *of* must be translated with a different preposition, usually מִי־ (*mi*-).
- Words identical to pronoun-including forms of שֶׁל־ often result from the straightforward composition of שֶׁ־ (*she*-, “that, which”) and לִי־ (*l'*-, “to”).

- In formal or archaic Hebrew, attributive uses of לֹש are often replaced with noun compounds (in which one noun is in the construct state), and predicative uses are often replaced with simply לֹ (l'-).
