Visit this site

www.apfn.net...

It said that Taw-50 is a reverse engineering of several crashed UFO. If it is true then none of our fighters(beside secret plane like TAW-50) or air defense can bring them down from our skies. If their craft is already this powerful that could defeat our air defense and air force. I can't imagine what if they really invade us☹

[Disclaimer disclaimer](#)

Okay, what does it mean?

In the most simple terms, we encourage people to share what they discover here on our websites, as long as they give us proper credit, and don't share entire posts on for-profit websites or other publications. You can include an entire post on another open-access public website, as long as you give the author credit, give AboveTopSecret.com credit, and link back to the URL of the discussion thread post. Linking back to the thread helps people discover the context of the discussion, especially if the content is current and evolving.

If you want to share our material on a for-profit website (one with advertising), you'll need to use a small snippet (not the entire post), and link back to the specific discussion thread post.

If you want to use entire posts or threads within a for-profit website, book, video, or other offline product, please [contact The Above Network, LLC](#) for more information on how to arrange proper rights. We assure you that we enthusiastically promote the efforts of our members and will work with you to negotiate usage rights that are in the best interest in the "common good" of collaboration and sharing.
