Orbs In Photos Transdimensional Light Beings UFOs

With the onset of digital cameras in the market, a lot of people have begun to notice "[Balls of Light](#)" in various sizes with a definitive pattern and inner glow in most of the [photographs](#) they'd taken. The key difference between a [digital camera](#) and a normal camera is that the digital camera has no film, instead it has a sensor that converts light into [electrical](#) charges.

At its most basic level, this is all there is to a digital camera. Just like a conventional camera, it has a series of lenses that [focus](#) light to create an

image of a scene. But instead of [focusing](#) this light onto a piece of film, it focuses it onto a semiconductor device that records light electronically. A [computer](#) then breaks this electronic information down into digital data and the pattern inside these [Orbs](#) can be seen even more clearly. Skeptics always have reasons to debunk / not believe in any aspect of the invisible universe, in this case accounting the round glowing orbs to dust particles, moisture or a faulty camera. On the contrary, the ones who have researched and experienced the Orb phenomena know otherwise.

Orbs are transdimensional light beings in simpler words they are a conscious form of spiritual energy traveling through dimensions and are mostly invisible to the naked eye seen by a few gifted people and captured by digital cameras all over the planet. [Orbs](#) are seen mostly around places with good vibrations such as places where people are singing, dancing, meditating or praying ... basically having a good time with a lot positive energy all around ! The most common belief is that [Orbs](#) are Spirits, Cherubs, Angels, Ghosts or Fairies watching over us and guiding us in subtle ways experienced within our conscious and subconscious states of awareness. Similar Balls of Light have been seen around crop circles and some believe some of these [Orbs](#) to be Extraterrestrials or UFOs manifesting interacting with the consciousness. Modern day Chi Kung Masters speak of Orbs as balls of energy that can communicate and heal. [Orbs](#) also react to peoples emotions and appear in greater numbers when people are experiencing emotions or conscious states of love, joy and bliss ! It is possible to [manifest Orbs](#) as it is an interactive phenomena and our consciousness creates ...

[Orbs](#) are seen in different colors as well. Most of the Orbs i have seen in pictures on the Internet and in some of the pictures I'd taken on my Olympus FE-330 are simple bright white balls of light while there are some blue orbs as well. There have been pictures taken by others which you can find on the net of orange, golden and pink orbs as well. Orbs are seen at spiritual gatherings,

I have an rather extremely unusual Orb photo. I've seen hundreds of pics of rain drops, dust, and floaters. I had never seen(til now) an orb that emits light that shines on the wall. I only ask if your interested, that you supply an email capable of receiving a photo 1.25Mb, for most sites are around 300Kbs or less. Like I said, I've seen many questionable pics and would like to hear an opinion of this one. My best to you, Sonny Day.

How can I submit an orb photo that is just too amazing? It emits light on the wall. You must be able receive a 1.25Mb photo. No-one will be a skeptic after seeing this photo. The one in a million shot. My best to you, Sonny day

I concur with Rick's comment (above or below), if there was any way to do it, I'd jump at the chance to share a few of my Orb collections. I just saw another amazing batch of photos featuring Orbs of many shapes and sizes floating directly above people's heads at an MLM/[Network Marketing](#) conference I attended in St. Louis last year. One of the shots is of a prominent religious event organizer & fellow MLM millionaire with a Silver Cord shooting from from his midsection right past my frame of view. Another shot is of a Mormon Bishop from Arizona chatting with a group of MLMers and a super-massive intensely white Orb looming directly over his shoulder while an eight-ball sized Orb ejects directly from his mouth at a very fast speed so as to leave a dust trail of light streaking past my frame of view like a mini comet emitting from his mouth. All weird stuff. In fact, using the same camera at the same time revealed most of the other shots devoid of any Orb anomalies, only certain people, certain groups of people, never just orbs alone in a hallway, but always around specific personalities and never in my viewfinder at the time I shot them. Using a [Kodak EasyShare](#) 7590.

i went to a place called whittingham mental asylum, it dates back from about 130 years ago in Lancashire England. Anyway i took my camera, to see if i could spot some orbs, i took a few pictures, and there was the odd one, as we started walking round the place, we came to a huge courtyard, instantly i felt in awe, at the same time i felt slightly sick and nervous. I took a picture. And the place was full of orbs, i turned to my friend and said, i really dont feel welcome here.we left shortly after that.

Please have a look at my picture video "[Living](#) UFO".
In the end you will see a close up of a hovering orb, that I have seen and studied myself from up close, like a face across the table.

It shows that your schematic interpretation is not correct. It is not just a ball with equal layers all around.

I found a perfectly round light blue orb behind my 3 year old daughter in a pic taken on Xmas Eve 2009. In the next photo take a second later, it was gone. It appeared to have a 'cartoonish' face. Pretty cool stuff!

Thank you for very interesting information about orbs. I have a homepage: GabrielleNamaste.se with some pictures of orbs. If you would like to look. I'm from Sweden but some pages are in english. I believe they are some kind of spiritual energy, because I felt them when I shooted the pictures, and I could only shoot the orbs when I was in higher level of spiritual energy. Again thank you for very interesting information on your homepage. Namasté Gabrielle
