US Air Force text book, Introductory Space Sciences, claims that there are at least four extraterrestrial species monitoring planet Earth.

John Lear claims there are 18 extraterrestrial races monitoring us and Sgt FC Cliff Stone claims they had catalogued 57 species of humanoid extraterrestrial by 1989....

It's certainly interesting how many abductees describing the alien greys they incur to seem as though they have been programmed and they act robotic. From what I gather there are three different types of alien grey, the smaller ones seem to be the programmed android servants.
